DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Showa Aluminum (JP 9-89477) in view of Horiuchi et al (WO 02/63223).

Showa Aluminum discloses a fluid passing flat hollow body (Fig. 2) including an upper and a lower flat plate (3) elongated laterally (Fig. 3), a peripheral wall (12, 13) interconnecting peripheral edges of the upper and lower walls (Fig. 2).

Showa Aluminum does not disclose a partition wall dividing the interior into two channels.

Horiuchi et al disclose a fluid passing flat hollow body in which a partition wall divides the interior into two channels.

It would have been obvious in view of Horiuchi et al to provide such a partition wall in the flat hollow body of Showa Aluminum, the motivation being to provide a longer flow path in the same space.

3. Claims 2-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3753

- 4. In claim 1, line 3, "walls" should be changed to "flat plates" to be consistent with line 2.
- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fuerschbach, Oikawa et al, Salmonson, Wu et al, Rong, Kato et al (JP 3-221789) are cited to show heat exchanger plate structure.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Teresa J. Walberg whose telephone number is 571-272-4790. The examiner can normally be reached on M-F 8:00 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric Keasel can be reached on 571-272-4929. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
